

Grocery Lab Day

Dear Parents,

Wednesday, June 1st, will be our last hands-on lab for the third grade year and we want to go out with a bang! For this to happen, we need a few grocery items for our exciting experiments. Please send in any of the following experiment combination grouped items:

- 1. Two liter bottle of cheap soda pop (99¢ store specials) and a pack of Mentos mints per bottle sent.

- a. Please don't send orange soda, it doesn't work well!
- b. Clear or dark soda works equally well.

- 2. A large clear-plastic soda bottle with its label removed and empty/dry inside. Please include a few squeezable-packet condiments. For example ↘

- 3. A small clear-plastic soda bottle or bottle water [individual serving size - 8 to 16 oz] with label removed and empty/dry inside. Please fill the bottle full of small marshmallows.

- 4. One uncooked potato.

Thank you for your effort and just wait for all the exciting stories that will be coming home that afternoon! Guaranteed!

Yours in science,

Master P

P.S. Water bottles could work but not as well.
